## pyetr

$100 \times 0.1=10 \mathrm{~mm}$
stage micrometers

## stage micrometers and calibration standards

## PS-Range of Long Scales

Scales from 50mm to 1 metre in length, chrome deposited on glass substrate, and supplied in a polished wooden case (except 50 mm version). Typically used for calibration of linear or two dimensional measuring systems.

## High Precision dards

For customers requiring the ultimate in precision and calibration traceability, Pyser Optics offer the NPL line scales, reference stage graticule, two dimensional position standard and photomask line width standard. These are all supplied with NPL's Internationally Traceable calibration certificate.

PGR Two Dimensional Calibration Standards
Glass plates with 10 mm grid squares occupying either $100 \mathrm{~mm} \times$ 100 mm or $140 \mathrm{~mm} \times 240 \mathrm{~mm}$, central area of 20 mm further subdivided into 1 mm squares. Typically used for calibration of co-ordinate measuring systems.

## Custom Made Calibration Products

For some customers a standard calibration product may not fulfil their requirements. In this case Pyser Optics are able to offer cost-effective production to custom designs. Please send drawing/specification or contact us to discuss.

## Certificates of Calibration

Wherever there is a need for measurements to be traceable for quality purposes, Pyser Optics offer UKAS and NPL certificates of calibration that are internationally traceable, so satisfy the requirements of NIST, DIN and National Metrology Institutes across the world.

## stage micrometers and calibration standards

For over 60 years Pyser Optics have been manufacturing precision micropattern products at our UK facility. Our stage micrometers and calibration standards are used all round the world for calibrating microscopes, imaging systems and co-ordinate measuring equipment. Where you need to have traceability of calibration, Pyser Optics offer certificates of calibration, traceable to International standards.

## S-Range Stage Micrometers

The scale or grid is chrome deposited centrally on a glass disc mounted in a black anodised aluminium slide mount $76 \mathrm{~mm} \times$ $25 \mathrm{~mm} \times 1.5 \mathrm{~mm}$ thick. The metal mount gives these stage micrometers greater durability than those of all glass construction. These products are supplied in a plastic case with foam insert and are intended for general microscope calibration.

## PS Multi-Image Calibration Slide

This unique artefact provides the most comprehensive solution to calibrating image analysis systems. An array of 16 different patterns and scales to a very high resolution, is chrome deposited on a glass slide, $76 \mathrm{~mm} \times 25 \mathrm{~mm} \times 1.5 \mathrm{~mm}$ thick. A unique serial number is etched into the slide.

## PS-Range Stage Calibration Standards

The scale is chrome deposited centrally on a glass disc mounted in a stainless steel slide mount, $76 \mathrm{~mm} \times 25 \mathrm{~mm} \times 1.5 \mathrm{~mm}$ thick, with a unique serial number engraved in the top surface. These are the products of choice where you need certified scales to have unequivocal traceability for ISO, NIST, DIN or other standards. These products are supplied in a polished wooden case to indicate that they are superior calibration tools.

## Calibration Slides for Hardness Testers

Whichever test method you use, be it Vickers, Rockwell or Brinell, Pyser Optics have the ideal calibration slide for you. For many years companies have used products such as the Pyser S78 and S1R reflected light stage micrometer scales which give a very straightforward calibration on one axis. Following long discussions with manufacturers of Hardness Testing equipment Pyser has introduced two new products specifically designed for this calibration with shapes to accurately replicate the impression.

## s-range stage micrometers

These stage graticules are intended for the routine calibration of eyepiece reticles particulary when alternating between objectives on one microscope or when using the same reticle in different microscopes.

Their robust construction, with metal slide mount, makes them ideal for student use and for instructional purposes. The scale or grid is centred on a glass disc mounted in a black anodised aluminium slide $76 \mathrm{~mm} \times 25 \mathrm{~mm} \times 1 \mathrm{~mm}$ thick. The image is created using vacuum deposited chrome which is resistant to normal wear and tear. Note: S18 is all glass scale.

Versions are available for transmitted light and reflected (incident) light

## horizontal and crossed scales - for transmitted light

| pattern | description | line width | accuracy (overall) | order code |
| :---: | :---: | :---: | :---: | :---: |
| S1 | Micrometer scale 10 mm in 0.1 mm divisions | $0.005 \mathrm{~mm}(5 \mu \mathrm{~m})$ | Within 0.002 mm | 02A00400 |

## particle analysis test slide

SG7 Ideal for staff training, this has 200 particles of various shapes and sizes. Each shape is numbered. Designed for comparing various shapes and sizes, and as a means for logging and communicating this information.

| pattern | description | order code |
| :--- | :---: | :---: |
| SG7 | Test slide for particle sizing. | $02 A 00422$ |
| This slide is now available with a Type Test Certificate, please enquire for details. |  |  |

## H.S.E./N.PL. MKIII test slide for phase contrast microscopy

This test slide is made in the UK under licence from the National Physical Laboratory.
It is an epoxy replica of a master slide produced and certified by that laboratory. The replicas are mounted on microscope slides of 1.2 mm thickness with cover glass of 0.17 mm thickness.

The purpose of the slide is to provide a standard means to check the performance of phase microscopes prior to the analysis of asbestos. The pattern consists of seven bands of twenty lines with widths ranging from $0.25 \mu$ to $1.1 \mu \mathrm{~m}$.

A satisfactory system will detect block 5 . Full details are supplied with the slide.

|  |  |  |

## vibration (FOE PPL Dot)

The amount of vibration of the slide in the appropriate axis is determined by the pair of dots which appear to merge into a single dot.
The pattern on the S 25 is an array of 20 pairs of dots converging on a single dot. The distance between each dot pair increases by 0.001 inch to a maximum of 00.2 inches, pairs being equispaced 0.25 inch. Supplied on $76 \times 26 \mathrm{~mm}$ glass slide.

| pattern | description | order code |

|  |  |  |

## finder graticules

Finder graticules are used to swiftly and accurately give a position of reference to an area of interest on a specimen slide.

## The England Finder - 9045 Findable Locations

The England Finder is a glass slide marked over the top surface in a way that a referenced position can be directly read relative to the locating edges.

All England Finders produced by Graticules for over 40 years are identical. The purpose of the finder is to give the microscopist an easy method of recording the position of a particular field of interest, so that the same position can be re-located at a later date, or by another person in another laboratory, or when using any other England Finder on any other microscope.
The location of the arrows is identical for all England Finder slides. The method of use is as follows: Mark a label on the left hand side of the specimen slide, indicating the orientation to be repeated. By replacing the specimen slide with the England finder, taking care not to disturb the position, the feature of interest can be noted. The feature can also be re-located at another place or time by reversing the procedure. A total of 9045 positions on a $76 \mathrm{~mm} \times 26 \mathrm{~mm}$ slide can be accurately located.

The ruled area is approximately $73 \mathrm{~mm} \times 24 \mathrm{~mm}$, each square is approximately 1 mm and line width is nominally $25 \mu$ Example of individual grid detail.

## the halton finder

Pattern as per $S 7$ but covers only a $5 \mathrm{~mm} \times 5 \mathrm{~mm}$ area in the form of a stage graticule.

| pattern | description | order code |
| :---: | :---: | :---: |
| S30 | The Halton Finder | 02 A 00413 |

## ps-range stage calibration standards

Stage calibration standards differ from the stage micrometers in that they have a unique serial number etched into the surface of the slide mount, so they are fully traceable when supplied with a NPL or UKAS certificate of calibration. This means that they satisfy the requirements of ISO traceability.

Pyser Optics Graticules Division can arrange for the calibration of its scales and grids to be carried out by the most appropriate laboratory to suit the customer requirements - the choice of laboratory is normally dependent on the nature of the calibration and the accuracy required.

- Calibration by NPL The National Physical Laboratory carries out measurements at selected points on the scales and grids and issues a certificate of calibration. This calibration is Internationally traceable.
- Calibration by UKAS Accredited Laboratory A UKAS accredited laboratory carries out measurements at selected points on the scales and grids and issues a calibration certificate. This calibration is Internationally traceable.
- Measurement by Graticules For applications which do not require the accuracy provided by calibrations carried out by NPL or a UKAS accredited laboratory, Graticules can provide a certificate of comparison. The scale or grid is compared with NPL calibrated in-house standards and a statement is provided on the accuracy of the item with respect to these standards. This calibration is Internationally traceable. When ordering any of the following parts with calibration certificate please add a suffix to the order code
ie:- 05A01040/NPL for PS1 with NPL certificate
05A01040/UKA for PS1 with UKAS certificate
05A01040/GRA for PS1 with Graticules certificate

## microscope standards for calibration of eyepiece reticles \& imaging systems

The scale is created as a vacuum deposited chrome image on a glass disc. The glass discs are then mounted in stainless steel slides with engraved serial numbers. Each slide is supplied in a polished wooden presentation and storage box to distinguish it as a traceable standard of high value.

| pattern | description | line width | accuracy (overall) | order code |
| :---: | :---: | :---: | :---: | :---: |
| PS1 | Micrometer scale 10 mm in 0.1 mm divisions | $0.005 \mathrm{~mm}(5 \mu \mathrm{~m})$ | Within 0.002 mm | 05A01040 |
| PS4 | Micrometer scale 0.1 inch in 0.001 inch divisions | $0.002 \mathrm{~mm}(2 \mu \mathrm{~m})$ | Within 0.0001 inch | 05A01041 |
| PS5 | Micrometer scale 20 mm in 0.01 mm divisions | $0.002 \mathrm{~mm}(2 \mu \mathrm{~m})$ | Within 0.004 mm | 05B01048 |
| PS8 | Micrometer scale 1 mm in 0.01 mm divisions | $0.002 \mathrm{~mm}(2 \mu \mathrm{~m})$ | Within 0.001 mm | 05A01042 |
| PS12 | Micrometer scale 0.1 mm in 0.002 mm divisions | $0.001 \mathrm{~mm}(1 \mu \mathrm{~m})$ | Within 0.001 mm | 05A01043 |
| PS16 | Crossed micrometer scale 1 mm in 0.01 mm divisions | 0.003 mm (3 $\mu \mathrm{m}$ ) | Within 0.001 mm | 05A01040 |

For longer scales see page 15

## new dual scale callibration

Pyser Optics has introduced two new calibration slides that have the benefit of dual imperial/metric scales. The PS52P is for transmitted light applications and has a bright chrome positive image. The PS52N has a negative pattern, formed in low reflective chrome for incident light applications to give excellent contrast. Both are ideal for calibrating optical products with a large field of view, such as stereo microscopes or imaging systems.

## highlights

- New Dual-Scale Calibration Slides
- 2" Imperial (English) and 50mm metric scales
on a single slide
- Positive and negative versions
- Unique serial number for traceability
- Available with internationally traceable certificates of calibration

## general specification

metric scale:
50 mm in 0.1 mm divisions
imperial (English) scale: 2inch in 0.005inch divisions
line thickness: 12 microns
accuracy (overall):
glass size/type
serial number:
case:
Within $\pm 0.005 \mathrm{~mm}$
$76 \mathrm{~mm} \times 25 \mathrm{~mm} \times 1.5 \mathrm{~mm}$, B270
Unique serial number on slide surface Supplied in polished wooden box
calibration certificate: Can be supplied with UKAS certificate
of calibration which is internationally
traceable \& acceptable in all world markets

| pattern | description | order code |
| :---: | :---: | :---: |
| PS52P | Dual calibration scale for transmitted light (positive image), 50 mm in $0.1 \mathrm{~mm}, 2^{\prime \prime}$ in $0.005^{\prime \prime}$, serial numbered, supplied in wooden case | 05B01052P |
| PS52P/UKA | As above but with UKAS certificate of calibration, 20 point check | 05B01052P/UKA |
| PS52N | Dual calibration scale for incidental light (negative image), 50 mm in $0.1 \mathrm{~mm}, 2^{\prime \prime}$ in 0.005 ", serial numbered, supplied in wooden case | 05B01052N |
| PS52N/UKA | As above but with UKAS certificate of calibration, 20 point check | 05B01052N/UKA |

## universal calibration slide

Calibration of microscopes and image analysis systems is becoming more sophisticated, with the requirement being for a variety of image patterns to satisfy the numerous parameters. Pyser Optics has introduced a new multi-function calibration standard specifically for these applications.

Multiple images on a single slide provide the most cost-effective solution to calibration and resolution checking of microscopes and image analysis systems. The combination of scales, dots, circles, squares, rulings, grids and angles can be supplied with an internationally traceable certificate of calibration for those who require ISO conformity.

Each glass slide has a unique permanent serial number and can be supplied with full or partial UKAS certificate of accuracy.
Starting from a fixed 'Datum point' mark, each individual pattern or array can be located using $X, Y$ coordinates. See table (over)

| pattern | description | order code |

Whichever test method you use, be it Vickers, Rockwell or Brinell, Pyser Optics have the ideal calibration slide for you. For many years companies have used products such as the Pyser S78 and S1R reflected light stage micrometer scales which give a very straightforward calibration on one axis. Following long discussions with manufacturers of Hardness Testing equipment Pyser has introduced two new products specifically designed for this calibration with shapes to accurately replicate the impression.

For Vickers and Rockwell methods we offer the PS25 which has a series of diamond shapes of varying size and x-y scales. Each of the markings on the slide is clearly identified with its size. The PS25 has a glass disc with the image precision marked in vacuum deposited chrome and this is cemented into a stainless steel slide mount, making the item very durable. The slide has a unique serial number indelibly marked on the slide mount and can be supplied with an Internationally traceable certificate of calibration.

For Brinell methods we offer the PS26 which has a series of circles, to represent the ball indentation shape, of varying size and $x-y$ scales. The PS26 has a precision marked chrome deposition image on a glass slide. Each of the markings on the slide is clearly identified with its size. The slide has a unique serial number indelibly marked on the slide mount and can be supplied with an Internationally traceable certificate of calibration.

Both products are supplied in a polished wooden box.

Not to scale and shown as positive image for clarity

## PS26 MKII pattern detail

circles: (diameter, mm's) 5.0, 2.5, 1.0, 0.7, 0.3
scales: horizontal \& vertical, 5 mm in 0.1 mm divisions accuracy (overall): $\pm 0.0015 \mathrm{~mm}$

| PS25 | PS25 MKIl Calibration slide for Vickers and Rockwell hardness testers, serial <br> numbered, supplied in wooden case |
| :---: | :--- |
| PS25/UKA | As above with UKAS (Internationally traceable) certificate of calibration |
| PS26 | PS26 MKIl Calibration slide for Brinell hardness testers, <br> serial numbered, supplied in wooden case |
| PS26/UKA 05B01025/UKA | As above with UKAS (Internationally traceable) certificate of calibration |

Calibration is performed by a UKAS accredited laboratory, whose measurements are traceable back to the UK's National Metrology Institute, the National Physical Laboratory. All of the NMI's in the world work in harmony under the International diplomatic treaty, the Treaty of the Metre signed in 1875. This means that all measurements carried out by the UKAS accredited laboratory are Internationally traceable so acceptable to satisfy the requirements of NIST, DIN and all other NMI's across the world.

## high definition long linear combination glass scales

## Superior PS-XO Versions

- High definition images for accurate calibration - line edge or line centre - Dots, Crosses and Scales - 300mm, 200mm, 150mm and 100 mm lengths, all in 0.1 mm divisions - Extended $0.5 \mathrm{~mm}, 1.0 \mathrm{~mm}$ and 5.0 mm lines allow calibrations in those increments too

Section image from PS-XO scales

All supplied in wooden cases. Alternative glass types and calibrations available to special order.

Also now available $70 \mu$ line width high definition 100 mm , $150 \mathrm{~mm}, 200 \mathrm{~mm} \& 300 \mathrm{~mm}$ scales in 1 mm divisions.

| pattern | description | size | order code |

| As above but with UKAS certificate of calibration, 10 points measured on scale |  |  | 05B01064/UKA |
| PS200XO | 200 mm combination scale, 200 mm ruling in 0.1 mm divisions, 1 mm dots at 10 mm centres, crosses at 10 mm centres, line width 0.03 mm | $230 \mathrm{~mm} \times 30 \mathrm{~mm} \times 6 \mathrm{~mm}$, green float glass, bright chrome image | 05Bt01065 |
| As above but with UKAS certificate of calibration, 10 points measured on scale |  |  | 05B01065/UKA |
| PS150XO | 150 mm combination scale, 150 mm ruling in 0.1 mm divisions, 1 mm dots at 10 mm centres, crosses at 10 mm centres, line width 0.03 mm | $180 \mathrm{~mm} \times 30 \mathrm{~mm} \times 6 \mathrm{~mm}$, green float glass, bright chrome image | 05B01063 |
| As above but with UKAS certificate of calibration, 10 points measured on scale |  |  | 05B01063/UKA |
| PS100XO | 100 mm combination scale, 100 mm ruling in 0.1 mm divisions, 1 mm dots at 10 mm centres, crosses at 10 mm centres, line width 0.03 mm | $130 \mathrm{~mm} \times 30 \mathrm{~mm} \times 6 \mathrm{~mm}$, green float glass, bright chrome image | 05B01062 |
| As above but with UKAS certificate of calibration, 10 points measured on scale |  |  | 05B01062/UKA |

## high definition long linear glass scales

Parallax free readings - ideal for measuring systems and CMM's
High levels of accuracy and pattern definition. Hard wearing scales in vacuum deposited chrome on substantial glass substrates. For measurement and calibration of instruments and standards.

| pattern | description | line width | accuracy (overall) | size (overall) | order code |
| :---: | :---: | :---: | :---: | :---: | :---: |
| PS100HS MKII | Long scale 100mm in 1 mm divisions | 0.07 mm | Within 0.007 mm | $130 \mathrm{~mm} \times 30 \mathrm{~mm} \times 6 \mathrm{~mm}$ | $05 \mathrm{B01069}$ |
| PS150HS MKII | Long scale 150 mm in 1 mm divisions | 0.07 mm | Within 0.008 mm | $180 \mathrm{~mm} \times 30 \mathrm{~mm} \times 6 \mathrm{~mm}$ | $05 \mathrm{B01066}$ |
| PS200HS MKII | Long scale 200mm in 1 mm divisions | 0.07 mm | Within 0.008 mm | $230 \mathrm{~mm} \times 30 \mathrm{~mm} \times 6 \mathrm{~mm}$ | $05 \mathrm{A01067}$ |
| PS300HS MKII | Long scale 300mm in 1 mm divisions | 0.07 mm | Within 0.008 mm | $330 \mathrm{~mm} \times 30 \mathrm{~mm} \times 6 \mathrm{~mm}$ | $05 B 01068$ |

All available with Certificate of Calibration

## Measuring Scales

These are standard glass scales for in-contact measurements. Ideal for direct vision, for pocket magnifiers and for use in measuring profiles on projector screens.

| pattern | description | order code |
| :---: | :---: | :---: |
| P6 | Contact nonparallax scale | $22 \mathrm{B01300}$ |
|  | 100 mm in 0.1 mm divisions. |  |
|  | Overall size $125 \mathrm{~mm} \times 25 \mathrm{~mm}$ $\times 3.0 \mathrm{~mm}$ Line width 0.025 mm |  |
| P16 | Contact nonparallax scale 300 mm in 0.5 mm divisions. Overall size $330 \mathrm{~mm} \times 30 \mathrm{~mm}$ $\times 6.0 \mathrm{~mm}$ Line width 0.10 mm | 22B01303 |

| pattern | description | line width | accuracy (overall) | size (overall) | order code |
| :---: | :---: | :---: | :---: | :---: | :---: |
| PS50 | Micrometer scale 50 mm in 0.1 mm divisions | 0.012 mm | Within 0.007 mm | $75 \mathrm{~mm} \times 75 \mathrm{~mm} \times 3 \mathrm{~mm}$ | 05B01051 |
| PS100 | Long scale 100 mm in 0.1 mm divisions | 0.03 mm | Within 0.015 mm | $130 \mathrm{~mm} \times 30 \mathrm{~mm} \times 6 \mathrm{~mm}$ | 05B01053 |
| PS150 | Long scale 150mm in 01 mm divisions | 0.03 mm | Within 0.015 mm | $180 \mathrm{~mm} \times 30 \mathrm{~mm} \times 6 \mathrm{~mm}$ | 05B01055 |
| PS300 | Long scale 300mm in 01 mm divisions | 0.03 mm | Within 0.025 mm | $330 \mathrm{~mm} \times 30 \mathrm{~mm} \times 6 \mathrm{~mm}$ | 05B01056 |
| PS500 | Long scale 500mm in 1 mm divisions | 0.07 mm | Within 0.025 mm | $530 \mathrm{~mm} \times 30 \mathrm{~mm} \times 6 \mathrm{~mm}$ | 05B01057 |
| PS1000 | Long scale 1000 mm in 1 mm divisions | $0.07 \mathrm{mm0} 07 \mathrm{~mm}$ | Within 0.025 mm | $1060 \mathrm{~mm} \times 30 \mathrm{~mm} \times 6 \mathrm{~mm}$ | 05B01058 |

Parallax free readings - ideal for profile projectors
Hard wearing scales in vacuum deposited chrome on substantial glass substrates. For measurement and calibration of instruments and standards.

## calibration grids

For checking two-dimensional instruments for straightness and accuracy. The patterns are produced in vacuum deposited chrome on glass.

- Lines every 10 mm
- Central 20mm subdivided in 1 mm rulings
- Line width 0.008 mm
- Linear straightness 0.002 mm
- Angular accuracy within 5 seconds

|  | PGR 100 | PGR 200 |
| :--- | :---: | :---: |
| Overall divided area | $100 \times 100 \mathrm{~mm}$ | $140 \times 220 \mathrm{~mm}$ |
| Glass size | $120 \times 120 \mathrm{~mm}$ | $160 \times 240 \mathrm{~mm}$ |
| Glass thickness | 6 mm | 6 mm |

| pattern | PGR 100 | PGR 200 |
| :---: | :---: | :---: |
| PGR 100 | calibration grid | $05 B 01030$ |
| PGR200 calibration grid | $05 B 01031$ |  |

## NPL high precision optical dimensional standards

This range of high precision optical dimensional standards are supplied complete with internationally traceable certificates of calibration from NPL. For full technical information please contact Pyser Optics Limited, Graticules Division.

## image analysis standard (reference stage graticule)

This calibration stage contains four test areas comprising; a $400 \times 400$ micron square grid, a $20 \times 17$ monosize array of 15 micron diameter spots, a Root-2 array of spots from 3 to 48 micron diameter, and a log normally distributed array of 100 spots ranging from 4.5 to 27 micron diameter. It is ideally suited for calibrating image analyser systems and can also be used as a high precision micrometer.

| pattern | description | order code |
| :--- | :--- | :--- |
| RSG | Reference stage graticule <br> $75 \mathrm{~mm} \times 25 \mathrm{~mm}$ slide | $05 \mathrm{B01085}$ |
|  |  |  |

## USAF test chart

USAF resolution charts are recognised the world over as a universal standard for testing the vertical and horizontal resolution of imaging systems. Each element on the chart comprises three vertical bars and three horizontal bars, and the detail on these slides is as fine as 0.78 microns ( 644 line-pairs per mm ). The resolution of the imaging system is normally specified as the Group and Element of the finest bars that can be clearly defined - See further information on back page of brochure.

The six versions manufactured by Pyser are as follows:

| pattern | description | order code |
| :---: | :---: | :---: |
| R70 | USAF Test Chart, positive image. Group 0, element 1 to Group 7, element 6. B270 glass, size $50 \mathrm{~mm} \times 50 \mathrm{~mm}$ | 06B01096 |
| R71 | USAF Test Chart, positive image. Group -2, element 1 to Group 7, element 6. B270 glass, size $75 \mathrm{~mm} \times 75 \mathrm{~mm}$ | $06 B 01097$ |
| R75P | USAF Resolution Chart, positive version. Group 0 , element 1 to group 9 , element 3 . Soda lime glass size $50 \mathrm{~mm} \times 50 \mathrm{~mm}$ | 06B01102 |
| R75N | USAF Resolution Chart, negative version. Group 0, element 1 to group 9 , element 3 . Soda lime glass size $50 \mathrm{~mm} \times 50 \mathrm{~mm}$ | 06B01103 |
| PS75P | USAF Resolution Chart, positive version. Group 2, element 1 to Group 9, element 3. Soda lime glass mounted in stainless steel microscope slide, with engraved serial number for traceability, $76 \mathrm{~mm} \times 25 \mathrm{~mm}$. Supplied in polished wood case. | 05B01090 |
| PS75N | USAF Resolution Chart, negative version. Group 2, element 1 to Group 9, element 3. Soda lime glass mounted in stainless steel microscope slide with engraved serial number for traceability, $76 \mathrm{~mm} \times 25 \mathrm{~mm}$. Supplied in polished wood case | 05B01091 |

## grid dot arrays

- 3 image areas all on one plate
- Different dot size and pitch in each area
- Ideal for different magnifications to test field flatness, distortion and size

Sizes: $12 \times 9$ array of 1 mm dots at 5 mm pitch
$16 \times 12$ array of 0.5 mm dots at 2 mm pitch
$24 \times 18$ array of 0.2 mm dots at 1 mm pitch

| pattern | description | size | order code |
| :---: | :---: | :---: | :---: |
| R76 | Grid dot array, 3 image areas, as detailed above | $101 \mathrm{~mm} \times 101 \mathrm{~mm} \times 2.2 \mathrm{~mm}$, <br> green float glass, high reflective <br> chrome image | 06B01104 |
